About Me

A 5th-semester Computer Science - Software Engineering student with a strong interest in web development and database management. Skilled in programming, system analysis, and software design, with experience in HTML, Python, Java, and SQL. Developing strong communication and interpersonal skills. Demonstrates leadership, organizational, and teamwork abilities, with high motivation to contribute effectively to professional software engineering projects.

Projects

Brewora Coffee

Built a personal project called Brewora Coffee, a web platform centered on coffee culture. Took full responsibility for identifying user requirements through research, and bringing the concept to life with a fully functional front-end developed in HTML, CSS, and JavaScript. The project emphasizes usability and responsive design

Kidneys Stone Detector

Designed and implemented a machine learning project in Python that leverages CNN modeling to detect kidney abnormalities, including kidney stones and other diseases. This project highlights the use of deep learning in supporting early diagnosis and medical decision-making.

Achievements

- 1st Place Valorant Competition Universitas Sriwijaya SI Competition 2022
- 2nd Place Valorant Competition Kertas 21 SMAN 21 Competition 2022

Experiences

- Participant in ICPC competition 2024
- Project manager in developing Coffee Website called Brewora Coffee

Skills

Hard Skills

- Programming language:
Python, C, Java, HTML
- UI/UX Design : Figma
- Excel, Word

Soft Skills

- Communication skills
- Problem-solving
- Management
- Teamwork & Collaboration
